

兔抗 CD63 多克隆抗体

中文名称：兔抗 CD63 多克隆抗体

英文名称：Anti-CD63 rabbit polyclonal antibody

别 名：CD63 molecule; MLA1; ME491; LAMP-3; OMA81H; TSPAN30

相关类别：一抗

储 存：冷冻（-20℃）

宿 主：Rabbit

抗 原：CD63

反应种属：Human

标记物：Unconjugate

克隆类型：rabbit polyclonal

技术规格

Background:

The protein encoded by this gene is a member of the transmembrane 4 superfamily, also known as the tetraspanin family. Most of these members are cell-surface proteins that are characterized by the presence of four hydrophobic domains. The proteins mediate signal transduction events that play a role in the regulation of cell development, activation, growth and motility. The encoded protein is a cell surface glycoprotein that is known to complex with integrins. It may function as a blood platelet activation marker. Deficiency of this protein is associated with Hermansky-Pudlak syndrome. Also this gene has been

	associated with tumor progression. Alternative splicing results in multiple transcript variants encoding different protein isoforms.
Applications:	ELISA, WB
Name of antibody:	CD63
Immunogen:	Synthetic peptide of human CD63
Full name:	CD63 molecule
Synonyms:	MLA1; ME491; LAMP-3; OMA81H; TSPAN30
SwissProt:	P08962
ELISA Recommended dilution:	5000-10000
WB Predicted band size:	26 kDa
WB Positive control:	293T and A549 cell lysates
WB Recommended dilution:	500-2000
